Remote Controller

The Ferguson Ariva T75 receiver is supplied with an extremely convenient and intuitive remote control with the RCU-76 symbol. Thanks to its Bluetooth connectivity, you can control the receiver from anywhere in the room without the need to „aim” at the receiver.

Description

Ferguson Ariva T75 is a universal terrestrial TV receiver broadcasted in DVB-T/T2 standard. The receiver supports the latest H.265 video codec and Dolby Digital audio coding standards in line with the latest European standards for terrestrial television broadcasting.

The small, aesthetic shape of the receiver will fit perfectly into any space around the TV set. For aesthetes who want to minimize the number of devices around their entertainment center, the manufacturer has provided facilities in the form of a pairable Bluetooth remote control that allows for remote control of the receiver without the need to aim the remote control at the IR diode. Additionally, a special basket is offered, thanks to which the receiver can be attached behind the TV set.

A rich set of connectors allows you to create a real multimedia center from the Ariva T75 receiver. Thanks to the S/PDIF connection, the user can enjoy surround sound and thanks to two USB ports, he can simultaneously connect an external hard drive to save favorite programs and a Wi-Fi dongle to support favorite online services. Additionally, thanks to the connection to the network, the receiver can update the software OTA.

Ferguson Ariva T75 is a terrestrial TV receiver offering many possibilities, ready for the latest TV standards in Poland and Europe.
